

How Does an EPIC Administrator Account Work?

How Does an EPIC Administrator Account Work?

EPIC Works on the EPIC Credit System. You purchase credits for your EPIC Account Distributors.

These credits are currency used to buy DiSC profiles. They work pretty much like food coupons. Like in coupons, you need different number of credits for buying different reports.

With the EPIC system you can administer almost 40 different types of reports, each report costing you a few credits. Each report in the EPIC system is assigned a credit value.

How Does an EPIC Administrator Account Work?

EPIC Credits are deducted from the credits inventory in your EPIC account when access codes are assigned to respondents/participants.

If you wish to clarify which report to administer : write to us now

Thank you
